

Notes

- 1) IM-827 needs the IC-29 Phantom Power jumper put in the "ON" position to work
- 2) We recommend a 1 gang plate with a 3 pin XLR (F) connector to plug this item into, similar to JP-3FS. Plate should be steel or heavy aluminium

Condenser Microphone
 Cardioid Pattern
 80-18KHz Frequency Response
 600 Ohm Impedence
 -72 dB Output level
 9 - 52 Vdc Phantom Power
